AgDiscovery: Prairie View A&M University

Last Modified:

The field of agriculture is not only about plants, animals, and farming. Agriculture covers a broad range of other industries and career possibilities. At Prairie View A&M University, you will learn about careers in animal sciences and related fields, including **veterinary medicine, plant and soil science, natural resources, environmental sciences, and food science and sustainability.**

You'll stay in on-campus housing, interact with our agriculture family and surrounding community, take part in team-building activities, meet with current Prairie View students, and delve into hands-on activities with professors using cutting-edge industry techniques. You will attend educational workshops and field trips to help set your career path and connect with the job industry.

Founded in 1876, Prairie View A&M University is the second oldest public institution of higher learning in the State of Texas. With an established reputation for producing engineers, nurses, and educators, Prairie View offers baccalaureate degrees in 50 academic majors, 37 master's degree programs, and 4 doctoral degree programs through 9 colleges and schools. A member of the Texas A&M University System, Prairie View is dedicated to fulfilling its land-grant mission of achieving excellence in teaching, research, and service. The College of Agriculture and Human Sciences trains students to enter careers in the areas of agriculture and human sciences, animal science, plant and soil sciences, natural resources and environmental sciences, agricultural economics, human nutrition and food, and food sciences.
