Plant Protection and Quarantine

Last Modified:

APHIS Plant Protection and Quarantine (PPQ) safeguards our Nation's crops and forests against the entry, establishment, and spread of economically and environmentally significant pests. In doing so, we help U.S. agriculture thrive—across the country and around the world.

Learn more about [our organization](#), [Plant Protection Today](#), and the [authorities](#) under which we work.

Priorities

Facilitating Safe Trade

We help U.S. agriculture thrive in the global marketplace and work with countries

Imports: Establishing Effective Regulations and Policies

We determine which plants and plant products can be imported and which pose a high risk and should be excluded. Our regulations and policies protect the environment and U.S. agriculture.
