## Camelid Commodity Import Into the United States: Disease Status Table

Last Modified:

The following is a list of commodities with import status and diseases present in each country. Reorder the table by selecting a column header.

For more information, see APHIS Definitions below.

Loading...

## **Camelid Commodities Import Status and Diseases Present**

## **APHIS Definitions**

Bovine: Bos taurus, Bos indicus, and Bison bison (domestic cattle, bison)

**Bovid:** All members of the family Bovidae, including domestic cattle, bison, water buffalo, yak, and related species

**Cervid:** All members of the family Cervidae and hybrids, including deer, elk, moose, caribou, reindeer, and related species

**Camelid:** All species of the family Camelidae, including camels, guanacos, llamas, alpacas, and vicunas

**Prohibited:** The importation of this commodity is banned by Federal regulations.

**Not Currently Allowed:** The importation of this commodity is not currently allowed due to other foreign animal diseases of concern in the country of origin, the lack of a negotiated or updated import protocol, or the lack of a negotiated export health certificate from the country of origin. For more information, contact APHIS.

**Allowed:** The importation of this commodity is permitted.

FMD: Foot-and-mouth disease

**CSF:** Classical swine fever

**ASF:** African swine fever

BSE: Bovine spongiform encephalopathy

**SVD:** Swine vesicular disease
