**Revision:** 02

**Previous Number:** ICWI0045.01

**Author:** SKARLI

**Section/Area:** CVB-WI-IC

**Release Date:** 14 Dec 2018

**Notes:**

## Requesting International Inspections

Source Document: Title 9, *Code of Federal Regulations*, part 104.5(a)(2)

Under normal circumstances, international inspections are conducted as a special inspection (i.e., pre-permitting inspection) or an in-depth (on-going compliance) inspection. Follow-up inspections are generally not conducted on foreign locations. If necessary, discuss the need with the Section Leader – Inspection and the Inspection and Compliance (IC) Director for concurrence.

The process described involves multiple parties and will be followed for scheduling, establishing cooperative agreements, funding, and international notification for all international inspections. For pre-permitting inspections, please allow approximately 6 months for approvals. In-depth inspections can be scheduled approximately 3 months out.

The *International Inspection Checklist* attached as an appendix to this document describes each of the steps and responsible parties to conduct the steps. [\*\*CVB-SOP-0024, Delegation of Authority for Center for Veterinary Biologics-Inspection and Compliance\*\*](#), should also be consulted for delegation of authority, if necessary, for approvals.

To use the checklist, follow the order of steps and activities. Each step identifies the “Responsible Party” that is to initiate each step and who they are to “Inform” based on position titles. Please make sure that every position identified in the “Inform” box is notified as instructed. Additionally, information is included regarding “Timeframe” on the checklist for each step.

The CSA Information Document prepared by the IC DO details the expected itinerary for the trip from departure to arrival back in Ames, Iowa. Please pay particular attention to the draft CSA Information Document when you receive it for review and make sure the expected time allocations are appropriate for the inspection/travel. Once approved, the Information Document forms the basis for the budget preparation and eventual funding by the U.S. Permittee of the inspection, including your salary and benefits, all travel expenses, and any travel compensation time. Any deviations from the expected itinerary require approval by the IC DO, MPA, and the U.S. Permittee, and may require additional funds be deposited in advance of the trip.

Additional details for Specialist are as follows when using the International Inspection Checklist – numbering follows the numbering listed on the Checklist.

1. Schedule Inspection

- a. International inspections are conducted every 2 years, unless otherwise noted.

b. [REDACTED]

[REDACTED] At that time, the Specialist assigned to the firm should contact the permittee and set up an inspection date that is acceptable to the Permittee, foreign manufacturer, and the CVB.

Please be aware of multiple sites that may need to be inspected and account for appropriate time and methods of travel.

- c. Once a date has been agreed on, request the inspection for all the appropriate sites in LSRTIS. This should be completed no later than 6 months prior to the inspection.

## Requesting International Inspections

- d. The Section Leader for Inspection will approve the inspection (all international inspections are approved within 1 week of the LSRTIS request).  
This will generate an email notification, including the IC Director. This is the flag to draft the international travel notification, **Step 2**.
3. Prepare the Pre-Travel Worksheet and submit the travel request in accordance with [\*\*CVB-WI-0010, Requesting to Attend Training or Travel for CVB\*\*](#)
- In some cases, the foreign site or permittee may make lodging reservations for you. While this is acceptable, the Specialist is responsible for the expense. The lodging and any taxes must be within the lodging per diem for that area. If not, actual subsistence may be requested. If the lodging reservations are made for you, please email the following to [REDACTED]:
    - Name, address and phone number of the hotel
    - Copy of the reservations, including confirmation number
    - Rate quoted, including all taxes (can be in foreign currency – so remember to include the unit of measure)
    - Cancellation policy
7. Provide travel info (cost and flight schedule)  
The flights (cost and schedule) may change when ticketed as there are no guarantees until the ticket is issued, but this estimate provides a basis for the expenses listed on the CSA.
8. Review travel information and confirm  
If there are questions concerning time needed for the actual inspection based on the travel information, please consult with a Section Leader or the IC Director.
9. Draft CSA Information Document  
Many times LSRTIS does not have all the information required for the CSA. The IC Director will ask the Specialist for the site contact at the foreign facility. The information required is name, phone number, and email. The site contact should have an APHIS Form 2007 on file with CVB.
10. Confirm CSA Information  
Please pay particular attention to the DRAFT CSA Information Document when you receive it for review and make sure the expected time allocations are appropriate for the inspection/travel.
14. Prepare Excel T&A Worksheet  
The IC Director will provide a Time & Attendance worksheet in Excel that will form the basis for the inspection. You should follow this very closely and not deviate unless travel conditions cause delays. Inspection days are capped at 8 hours. You will be compensated for actual travel time.
15. Request Travel Comp in WebTA  
Once you are provided this shell, you should request the appropriate amount of travel comp in WebTA and make note of the CSA # in the WebTA remarks.

## Requesting International Inspections

Order	Activity	Responsible Party	Inform	Timeframe
1	SCHEDULE Inspection in LSRTIS Contact firm to confirm dates will work	Specialist	IC Inspection Section Leader (SL Insp) cc: Management & Program Analyst (MPA), IC Director (IC D)	October 31, or at least 3 months prior, for in-depth inspections 6 months prior for prelicensing inspections
