

## August 2022

| <b>Date</b>    | <b>Number of Samples</b> | <b>Confirmed Positive Cages</b> | <b>Cumulative Program Samples</b> |
|----------------|--------------------------|---------------------------------|-----------------------------------|
| September 2021 | 99                       | 0                               | 24188                             |
| October 2021   | 84                       | 0                               | 24272                             |
| November 2021  | 89                       | 0                               | 24361                             |
| December 2021  | 80                       | 0                               | 24441                             |
| January 2022   | 80                       | 0                               | 24521                             |
| February 2022  | 90                       | 0                               | 24611                             |
| March 2022     | 98                       | 0                               | 24709                             |
| April 2022     | 69                       | 0                               | 24778                             |
| May 2022       | 55                       | 0                               | 24833                             |
| June 2022      | 104                      | 0                               | 24937                             |
| July 2022      | 120                      | 1                               | 25057                             |
| August 2022    | 81                       | 0                               | 25138                             |

There were 12 surveillance inspections conducted at 12 different sites for a total of 81 fish sampled this month. Samples are targeted to moribund and fresh mortalities when possible. The water temperatures continued to rise in response to the warmer air temperatures. Routine harvest continued. All sites with fish in the water remained Category 1 and were scheduled for monthly sampling.
