September 2022	74	0	25212
October 2022	66	0	25278
November 2022	55	0	25333
December 2022	69	0	25402

There were 8 surveillance inspections conducted at 8 different sites for a total of 69 fish sampled this month. Samples are targeted to moribund and fresh mortalities. The water temperatures continued to decrease due to colder air temperatures. Routine harvest continued. One site was identified as Category 2 and will conduct biweekly sampling, along with the other active site in the same bay. All other sites with fish in the water remained Category 1 and were scheduled for monthly sampling.
