November 2021	89	0	24361
December 2021	80	0	24441
January 2022	80	0	24521
February 2022	90	0	24611

There were 9 surveillance inspections conducted at 8 different sites for a total of 90 fish sampled this month. Samples are targeted to moribund and fresh mortalities when possible. The water temperatures remained steady in response to the cold air temperatures. All sites with fish in the water remained Category 1 and were scheduled for monthly sampling. Routine harvest continued. No cages were confirmed positive this month.
