January 2020	81	0	21967

There were 9 surveillance inspections conducted at 8 different sites for a total of 81 fish sampled this month. Samples are targeted to moribund and fresh mortalities when possible. The water temperatures continued to decrease in response to colder air temperatures. Seven of the 8 sites with fish in the water remained Category 1 and were scheduled for monthly sampling. One Category 2 (suspect) site was scheduled for biweekly sampling. No cages were confirmed positive this month.
