January 2022	80	0	24521
February 2022	90	0	24611
March 2022	98	0	24709
April 2022	69	0	24778
May 2022	55	0	24833
June 2022	104	0	24937
July 2022	120	1	25057

There were 13 surveillance inspections conducted at 12 different sites for a total of 120 fish sampled this month. Samples are targeted to moribund and fresh mortalities when possible. The water temperatures continued to rise in response to the warmer air temperatures. Routine harvest continued. One cage was confirmed positive this month. It was removed proactively by the company before it was confirmed. This site was considered Category 2 and increased sampling frequency until it was completely harvested and no fish remained. All other sites with fish in the water remained Category 1 and were scheduled for monthly sampling.
