May 2023	60	0	25730
June 2023	55	1	25785
July 2023	60	0	25845

There were 12 surveillance inspections conducted at 10 different sites for a total of 60 fish sampled this month. Samples are targeted to moribund and fresh mortalities. The water temperatures continued to increase in response to warmer air temperatures. Routine harvest continued. One Category 2 site is scheduled for biweekly sampling. All other sites with fish in the water remained Category 1 and were scheduled for monthly sampling.
