

May 2024

| Date | Number of Samples | Confirmed Positive Cages | Cumulative Program Samples |
|----------------|--------------------------|---------------------------------|-----------------------------------|
| June 2023 | 55 | 1 | 25785 |
| July 2023 | 60 | 0 | 25845 |
| August 2023 | 50 | 0 | 25895 |
| September 2023 | 45 | 0 | 25940 |
| October 2023 | 45 | 0 | 25985 |
| November 2023 | 45 | 0 | 26030 |
| December 2023 | 45 | 0 | 26075 |
| January 2024 | 45 | 0 | 26120 |
| February 2024 | 40 | 0 | 26160 |
| March 2024 | 40 | 0 | 26200 |
| April 2024 | 40 | 0 | 26240 |
| May 2024 | 50 | 0 | 26290 |

There were 10 surveillance inspections conducted at 9 different sites for a total of 50 fish sampled this month. Samples are targeted to moribund and fresh mortalities. The water temperatures continued to rise with the warming air temperatures. Routine harvest continued and stocking of smolts continued. All sites with fish in the water remained Category 1 and were scheduled for monthly sampling.
