July 2022	120	1	25057
August 2022	81	0	25138
September 2022	74	0	25212

There were 9 surveillance inspections conducted at 9 different sites for a total of 74 fish sampled this month. Samples are targeted to moribund and fresh mortalities when possible. The water temperatures remained steady. Routine harvest continued. All sites with fish in the water remained Category 1 and were scheduled for monthly sampling.
