Veterinary Health Certificate for the Import of Live Fish, Fertilized Eggs, or Gametes of Spring Viremia of Carp (SVC) Susceptible Species from the People's Republic of China into the United States of America

Competent Authority for Aquatic Animal Health:*
General Administration of Customs of the People's Republic of China (GACC)

Health Certificate Number:*

I, the undersigned Official Veterinarian of the Competent Authority, certify that the live animals described above meet the following conditions:

1. Spring Viremia of Carp (SVC):
 - a. The facility of origin participates in an ongoing Spring Viremia of Carp (SVC) monitoring program for species susceptible to SVC, by testing twice annually for a minimum of two (2) consecutive years, with at least three (3) months between tests. **AND**
 - b. Populations were tested at a ninety-five (95) percent confidence and two (2) percent assumed prevalence level, and found negative for SVC. **AND**
 - c. Sample collection was done at times when water temperatures are conducive to detecting SVC virus. **AND**
 - d. Samples were collected by an Official Veterinarian representing the Competent Authority. **AND**
 - e. Cell cultures were incubated on epithelioma papulosum cyprinid (EPC) or Fathead minnow (FHM) cell lines at fifteen (15) to twenty-five (25) degrees Celsius, with at least two (2) serial passages and evaluation of cytopathic effect (CPE) for a minimum of seven (7) days after each passage. All testing results were negative for SVC.
2. No WOAHA-listed pathogens affecting this species were reported at the facility of origin within sixty (60) days prior to export.
3. The animals originate from the exporting country OR were legally imported and verified to be of equal health status before entering the population for export.
4. The consignment was inspected by an Official Veterinarian of the exporting country's Competent Authority within seventy-two (72) hours of shipment, and found to be free of any clinical evidence of SVC disease.
5. All shipping containers are either new, OR have been properly cleaned and disinfected prior to use. The animals described above are packaged in separate bags from any other aquatic animals.
6. This health certificate is valid for a single source facility, and must accompany the animals described above.

After the animal inspection, this health certificate is valid for seventy-two (72) hours.
